- Mobile App Testing
- Team Mentoring
- Test metrics preparation assistance to the Test Lead

Projects Handled:

FoxHopr

URL: Under Development

Team Size: 11

Framework: MVC architecture with core PHP

Technologies: PHP, HTML, jQuery, Ajax, Javascript, Google charts, Xcode, Adobe Connect

Approach Used: Manual Testing

This is a unique business networking website with referral sharing functionality. It allows the various professionals from all over the globe to register themselves on the site as per their profession and share referrals with other professionals who are members of the same group.

Upon selection of a group, the professionals can share referrals, messages with the group members. FoxHopr also allows the professional to meet virtually through the Adobe Connect Video Conferencing tool. The professionals can invite their friends and other partners on the website and earn bonus on every successful sign up.

Core Features:

1. Shuffling of group members in every 90 days, allowing them to meet various professionals in different groups.
2. Video conferencing functionality for the group members to meet virtually and share the knowledge with the same group members.
3. Earn bonus by inviting the friends to be a part of the FoxHopr family.
4. Getting reviews through the referrals shared by the group members.

ROLES & RESPONSIBILITIES:

- Ø Review of business documents for the proposed features and functionality
- Ø Participating in daily scrums to finalize deliverables
- Ø Creation and execution of test cases & test scenarios
- Ø Design, specify and implement test plans and test reports based on product requirements with direction from the QA Team Lead
- Ø Defect reporting in JIRA & Bugzilla
- Ø Work with the development team to resolve issues found throughout the STLC to avoid future delays
- Ø Functional testing, Integration testing, User Interface testing, Sanity testing and BAT.
- Ø Database testing to validate data integrity and consistency
- Ø Bug Isolation & Defect Reporting using tools like JIRA and Bugzilla
- Ø Re-testing and regression testing

PM Aura

<http://a3logics.pmaura.com>

Team Size: 5

Framework: MVC architecture with core PHP

Technologies: JAVA, PHP5.3, HTML, jQuery, Ajax, CSS, Google charts

Approach Used: Manual Testing

PM Aura is a next generation project management tool that allows working in a collaborative environment where we can manage projects in an easy and efficient way.

Task Management: Allows assigning tasks to team members easily, monitor performance, and get notified for any delays or discrepancy.

Time-sheet Management: Manage team's weekly time-sheets, track their progress as well as manage budget and project's spending.

Decision making reports: Whether want to track projects' status, project budgets, team efficiency or anything, It provides easy decision making reports which not only give transparent picture of projects but also help to take right decisions for project success.

Alerts & Notifications: Will be notified for everything whether task is delayed, whether time-sheet is approved/rejected or if project is running on track or not.

ROLES & RESPONSIBILITIES:

- Ø Review of business documents for the proposed features and functionality
- Ø Participating in daily scrums to finalize deliverables
- Ø Creation and execution of test cases & test scenarios
- Ø Design, specify and implement test plans and test reports based on product requirements with direction from the QA Team Lead
- Ø Work with the development team to resolve issues found throughout the STLC to avoid future delays
- Ø Functional testing, Integration testing, User Interface testing, Sanity testing and BAT.
- Ø Bug Isolation & Defect Reporting using tools like JIRA and Bugzilla
- Ø Re-testing and regression testing

Peeker iOS App

Team Size: 3

Framework: MVC architecture,

Technologies: PHP (for web services), Xcode IDE

Approach Used: Manual Testing

Peeker is an iOS app (iPad & iPhone) intended to target the app savvy audiences that lets them to see and download new apps that are not only popular amongst other registered users but are downloaded by most of them as well. This way, users will have the most popular and new apps on their iOS devices so that they have a good idea of the apps around them.

It was built primarily around the modules mentioned below:

My Apps: Lets the user to view the apps that has been installed on his/her device

Peek: Lets the user to have a look at the apps that are common with the other registered user(s) as compared to the total number of unique apps installed by both of them

Favorites: Lets the user to view the apps that has been marked as 'Favorites'

New Users: Lets the user to have a look at the new users who are using the app which in turn gives idea of the apps shared installed by them

Hot Apps: Lets the user to view the popular apps downloaded and installed by other users and facility to install

those apps on his/her devices as well

ROLES & RESPONSIBILITIES:

- Ø Review of business documents for the proposed features and functionality
- Ø Participating in daily scrums to finalize deliverables
- Ø Creation and execution of test cases & test scenarios
- Ø Design, specify and implement test plans and test reports based on product requirements with direction from the QA Team Lead
- Ø Work with the development team to resolve issues found throughout the STLC
- Ø Functional testing, Integration testing, User Interface testing, Sanity testing and BAT.
- Ø Bug Isolation & Defect Reporting using tools like JIRA and Bugzilla; Re-testing and regression testing

Dotsquares

Feb 2011 - Oct 2013

Quality Analyst

Projects Handled:Gamerpeer

<http://www.gamerpeer.com/>

Team Size: 5

Framework: MVC architecture with YII framework

Technologies: PHP, MySQL, JavaScript, Ajax, C/C++, Mail API

Approach Used: Manual Testing

A social networking site for the gamers that helps them in searching like-minded gamers through the mathematical search algorithms. The basic idea behind “GamerPeer” was to implement a platform that allows like-minded gamers to communicate through the integrated messaging module and let them plan their own gaming session.

ROLES & RESPONSIBILITIES

- Ø Review of business documents for the proposed features and functionality
- Ø Answering client's queries and handling day to day grievances after discussing with the team.
- Ø Creation and execution of test cases
